Software Developer with over five years of experience in full-stack development and leading product cycle from conception to completion. My goal is to utilize my skills in programming, software design, and project management to help teams deliver high-quality software products that meet and exceed client expectations. I am passionate about using technology to solve complex problems, and I thrive in collaborative environments that encourage creativity and innovation. Along with work experience in both healthcare and finance, I bring strong interpersonal, public speaking, and client-facing skills, experience managing multiple teams, and extensive knowledge in breaking down problems into their component parts.

Employment History

FCB Health - New York, NY   **Feb '19 - Present**
Senior Software Developer
- Spearheaded the development of advanced web-based projects, including highly customized CMS-based websites (WordPress, Drupal), API-integrated platforms, and enterprise-level interactive applications like Touch Screen Panels and Veeva IVAs.
- Collaborated cross-functionally with stakeholders across Creative, Project Management, DevOps, QA, and Analytics to ensure seamless project execution and alignment with client goals.
- Delivered strategic technical training sessions and workshops for team-wide upskilling in emerging technologies and methodologies.

Software Developer
- Managed and developed numerous web based projects including email blasts, banner ads, websites, websites built on third party APIs, websites built with a CMS integration (Wordpress, Drupal), Interactive Touch Screen Panels, and Interactive Visual Aids (Veeva IVAs)
- Collaborated with various departments including Project Managers, Creative, Account Management, DevOps, Quality Assurance, and Analytics

Junior Software Developer
- Translated static graphic designs (Photoshop, Illustrator) into working web applications using HTML, CSS, and JavaScript.
